

Mobile Dentist Smile Program Overview

The Mobile Dental Group provides examinations, cleanings, fluoride treatments, sealants, xrays, and some restorative care by filling cavities or pulling baby teeth, if necessary. These services are covered 100% by any student that has active Medicaid or CHIP. Services will be covered as outlined by other individual dental insurance companies, with possible out of pocket expense to the parent after the care has been given. Any student that does not have Medicaid, CHIP or private dental insurance, can apply for a reduced rate cost or free charity care through the Mobile Dentists, which will include the screening, cleaning and fluoride service. If a parent asks for free charity care, the Mobile Dental group will contact that parent and request a simple application form be completed, one that does not ask for any tax forms or pay stubs to be presented, but just a form they need on file for their charity cases. From our past experience, anyone who requested the charity care and completed the necessary forms, received 100% coverage of the service. Applications will need to be completed annually for any student taking advantage of the program.

The Mobile Dental Group cannot provide even a simple screening evaluation on a student without having a completed Smile Pennsylvania form on their specified paperwork.
